PROJECTS

Medicinal Plant Detection System

Python, TensorFlow, Flask, HTML, CSS, Javascript

- Developed a CNN-based model to detect and classify medicinal plants.
- Built the backend using Flask to integrate the trained TensorFlow model with the web interface.
- Designed a responsive frontend for image upload, and plant information display.
- Displayed plant characteristics, medicinal uses, and related details after detection to assist users in plant identification.

Face Shape-Based Jewellery Recommendation System

Python, TensorFlow, Keras, OpenCV, Flask, HTML, CSS, Javascript

- Built a face shape detection system using deep learning and OpenCV.
- Recommended suitable earrings and necklaces based on detected face shape.
- Developed a responsive front-end using **HTML, CSS, JavaScript**.
- Integrated Flask backend with trained model.
